

- 1. B 5. ~~B~~ 9: A
- 2. B 6: A 10: D
- 3. B 7: A 先序, 后序, 后序
- 4. D 8: A ↓

不带头节点, 则头指针 $\rightarrow a_1$

二. 1. head - next = Null
head = Null

2. $2^5 - 1$; 4

5. _____

3. 根的左右子树的深度差不大于1的数

4. 若要删除的结点为 q 则 $p \rightarrow next = q \rightarrow next$
 $free(q)$

$p \rightarrow prior \rightarrow next = p \rightarrow next$

$p \rightarrow next \rightarrow prior = p \rightarrow prior$

$free(p)$

三. 11) 12). X

1	1	6
1	3	2
2	2	5
4	3	5
4	4	3
5	1	7
5	5	9

311) 由图知: 矩阵不对称 $\rightarrow$ 有向图

题

0	v_0	$\rightarrow$	<table border="1"><tr><td>1</td><td>$\wedge$</td></tr></table>	1	$\wedge$		
1	$\wedge$						
1	v_1	$\rightarrow$	<table border="1"><tr><td>2</td><td>$\wedge$</td></tr></table>	2	$\wedge$		
2	$\wedge$						
2	v_2	$\rightarrow$	<table border="1"><tr><td>3</td><td>$\wedge$</td></tr></table>	3	$\wedge$		
3	$\wedge$						
3	v_3	$\rightarrow$	<table border="1"><tr><td>0</td><td>$\rightarrow$</td></tr></table> $\rightarrow$ <table border="1"><tr><td>4</td><td>$\wedge$</td></tr></table>	0	$\rightarrow$	4	$\wedge$
0	$\rightarrow$						
4	$\wedge$						
4	v_4	$\rightarrow$	<table border="1"><tr><td>0</td><td>$\wedge$</td></tr></table>	0	$\wedge$		
0	$\wedge$						

4.

0	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
11	23	57	69	54	16	17	6	28	39	54	89					
1	1	1	1	6	1	1	2	3	4	1						

$$69\%11=3$$

$$54\%11=10$$

$$16\%11=5$$

$$17\%11=6$$

$$6\%11=6 \rightarrow (6+1)\%11=7$$

$$23\%11=1$$

$$17\%11=6$$

$$57\%11=2$$

$$54\%11=10 \rightarrow (10+1)\%11=0 \rightarrow (10+2)\%11=1$$

$$\rightarrow (10+3)\%11=2 \rightarrow (10+4)\%11=3 \rightarrow (10+5)\%11=4$$

$$28\%11=6 \rightarrow (6+1)\%11=7 \rightarrow (6+2)\%11=8$$

$$39\%11=6 \rightarrow (6+1)\%11=7 \rightarrow (6+2)\%11=8 \rightarrow (6+3)\%11=9$$

$$89\%11=1 \rightarrow (1+10)\%11=0 \text{ (已满)}$$

再散列: 取 $H(\text{key}) = \text{key} \rightarrow \text{key} \rightarrow \dots$

先 Hash 函数 $\%11$

后线性散列: $(H(\text{key}) + di) \% m$
 $\downarrow$
 表长

17 ASL:

5: 41

121

131

直接选择算法 或 冒泡法
 (一次就找出最大点)

6 48 75 64 63 29 61 50 69

50 48 75 64 63 29 61 - 69

50 48 - 64 63 29 61 75 69

50 48 29 64 63 - 61 75 69

50 48 29 63 64 61 75 69

50 48 29 57 63 64 61 75 69

7. 设链表为 stack

二叉树为 BTreeNode

int Addstack (stack *head, BTreeNode *root)

{ head = head -> next

head -> value = root -> value

Addstack (~~stack~~ *head, BTreeNode *left,

Addstack (~~stack~~ *head, BTreeNode *right,

审题: 将叶子节点加入到链表中
